

CUBSON

“OVER 30 YEARS PROVIDING EXCELLENCE”

ABOUT THE COMPANY

Founded in 1994, Cubson International Consulting was born as your partner for development. We are a very dynamic and flexible group of 23 expert people in Europe and 17 in the other locations with a long technical, production and commercial experience worldwide in the powder coatings and surface treatment business.

Cubson offers a wide range of products. **Epoxy, Epoxy Polyester, Polyester** and other innovative products.

VISION

Our vision is to produce the highest quality powder coatings for our clients, being a key partner for their growth and manufacturing process.

MISSION

Research, development and innovation is our mission to have a strategic position in the powder coatings business having carried out research projects financed **by European Union funds**.

R&D&I

Apart from the standard coating powder products, **CUBSON consider research, development and innovation a key factor of its success.**

These efforts allowed the company to create and develop new products with **nanoparticles** and materials like **graphene**. Consequently, the powder paintings developed have enhance capabilities such higher resistance or ability to destroy viruses.

TOUCH UP SPRAYS

STANDARD PRODUCT

FOR INTERIOR USAGE

EPOXY

Used for indoor surfaces. It offers excellent chemical resistance and is special for appliances and products that have contact with food.

EPOXY-POLYESTER (HYBRID)

Epoxy polyester is a mixture of polyester resins that are catalyzed with epoxy resin in different proportions. Usually 50/50, 60/40 and 70/30. Interior use of low and medium aggressiveness, with good chemical and mechanical properties.

Use in luminaires, furniture, shelves, gondolas and cabinets.

*Custom-made

In CUBSON we adapt to your needs and offer a custom-made possibility for clients with different needs in color matching outside of our standard shown products. We develop the products in our lab to get our clients expected results.

FOR EXTERIOR USAGE

POLYESTER INDUSTRIAL & QUALICOAT

Exterior use based on resin catalyzed with or without TGIC. It offers excellent resistance to UV radiation and color retention to the weather. Its use extends to windows, garden furniture, rines, parabolic, among others.

QUALICOAT* - This certification guarantees that the final product is suitable for outdoor use and meets the quality requirements set out in the Qualideco specifications.

SPECIALITIES

In CUBSON we adapt to your needs and offer a custom-made possibility for clients with different needs in color matching outside of our standard shown products.

*For inquiries and further information, please contact CUBSON@cupson.com

PREMIUM PRODUCTS

GRAPHECOAT

Graphecoat is a new line of products that provides enhanced capabilities and resistance.

Graphene solutions provides a super durable polyester powders coat quality and performance. CUBSON brings the next-generation of anti-corrosion powder coating. GRAPHECOAT blends Graphene advanced nano-materials into coating formulations safely and effectively without any changes needed in the customer's production process.

QUALICOAT* - QUALIDECO guarantees that the final product is suitable for outdoor use and meets the quality requirements set out in the Qualideco specifications.

COPPER NANOPARTICLES

We have powder coating development with alcohol-based gel made from copper nanoparticles.

This mix helps to kill viruses and proliferation of fungi and algae.

MULTI NANOPARTICLES

CUBSON's is constantly developing a wide range of coatings with different particles for different usages and projects.

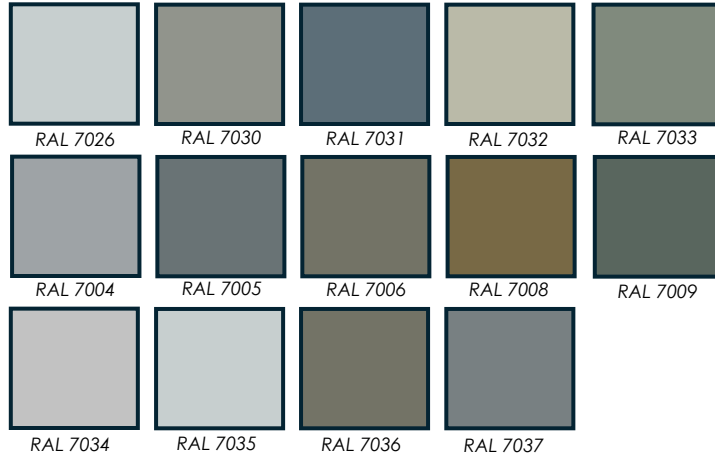

For special projects and consultation, contact cubson@cubson.com

GRAPHENE BASED

“GRAPHECOAT ®”

CUBSON’s technical team has developed a new set of powder paintings incorporating graphene into its formulation.

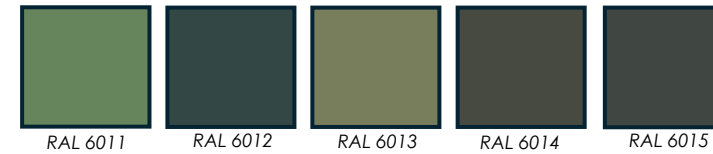

This development showcased **boosts in corrosion resistance of over 20% and durability in over 50% compared to the powder coatings without this technology, according to the tests accomplished in our lab.**

NANOPARTHICOLES

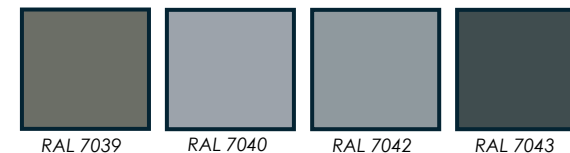

COPPER NANOPARTICLES

CUBSON’s antimicrobial powder coatings are ideal for high traffic areas, including health products, architectural ironmongery, handrails and leisure equipment, among others.

MULTI - PARTHICOLES

CUBSON’s is constantly developing a wide range of coatings with different particles for different usages and projects. For special needs, contact info@cubson.com for further information.

SUBLIMATION PRODUCTS

We provide a wide range of products designed to decorate both metallic and non-metallic surfaces, which can be used either for indoor and outdoor.

Meant for every need, the architectural products offer a huge variety of decorations which ennoble surfaces of various kinds.

In addition to sublimation films, the offer includes also, lamination films and transfer films.

All our sublimation product are also certified by the Qualicoat-Qualideco certification that guarantees high-quality and resistance.

CHEMICAL PRETREATMENTS

We also deal with chemical products for different metallic surfaces

- Aluminum
- Cold and hot rolled.
- Stainless Steel.
- Cast iron

TOUCH-UP SPRAYS

We produce Sprays with liquid coatings (touch-up paints) to give extra service to our powder coating customers.

CUBSON

TECHNICAL SERVICES

Technical assistance

We count on a professional team that will ensure to solve all your questions to make sure you select the most appropriate product based on your needs.

Quality Control

Our R&I lab consists of over 20 different machines to control the quality of the products we produce.

CERTIFICATIONS QUALICOAT- QUALIDECO

It is the quality mark for decorative finishes obtained by means of sublimation, powder-on-powder coating and rotary pad printing techniques. This certification guarantees that the final product is suitable for outdoor use and meets the quality requirements set out in the Qualideco specifications.

ISO 9001:2015 -Certificate N.49276

It is the reference standard for the certification of quality management systems. It allows companies to highlight their ability to provide high standard products. Centrality of the customer and attention to continuous improvement are the fundamental requirements for receiving this certification.

ICEX VIVES

CUBSON & EUROPEAN UNION

CUBSON INTENATIONAL C.S.L. in the framework of the ICEX Next Export Initiation Program has been supported by ICEX and co-financed by the European ERDF fund.

The purpose of this support is to improve the global competitiveness of Cubson International. The results obtained are an improved value proposition and a business model adapted to the company's new international business environment. This has allowed Cubson to obtain a service offer more adapted to the needs of our clients.
